DIGITAL MANUFACTURING TRAINING

# Project Partners

# The Digit-T Project

The manufacturing industry is currently witnessing a transformation as it increasingly moves towards Digital Manufacturing – often known as Industry 4.0, Smart Manufacturing, Factory of the Future. It offers opportunities for companies to develop new products and ways of working while reducing costs. However, many people and organisations, in particular SMEs, struggle to access clear and useful information about Digital Manufacturing.

The Digital Manufacturing Training System for SMEs (Digit-T) project has created a free online training programme aimed at helping users to understand what Digit Manufacturing is, the associated terminology, the expected benefits, and how an organisation can start adopting it.

The training materials, which are available in **English, Spanish and Italian**, is split into 2 parts:

## Online training course

The online training course is divided into 3 topics:

- Management in Industry 4.0
- Advanced Manufacturing Systems
- Intelligent Robotics

Each topic is split into 3-4 training modules which are sub-divided into a series of sessions.

**The online course and ebook can both be accessed via the Digit-T web-site: [digit-t.eu](http://digit-t.eu)**

## eBook

The ebook complements the online training course. It is divided into the same 3 topic areas as the training course, though presents the material in a slightly different way.
